Acknowledgments

We would like to thank A. Buchel, S. Hartnoll, C. Herzog, E. Katz, A. L. Fitzpatrick, A. Lucas, P. McFadden, and S. Sachdev for useful discussions. Research at Perimeter Institute is supported by the Government of Canada through the Department of Innovation, Science and Economic Development and by the Province of Ontario through the Ministry of Research & Innovation. WWK was supported in part by a postdoctoral fellowship from NSERC as well as by MURI grant W911NF-14-1-0003 from ARO. TS is supported in part by the Ontario Graduate Scholarship. RCM and TS are also supported in part by an NSERC Discovery grant. RCM is also supported by research funding from the Canadian Institute for Advanced Research and from the Simons Foundation through the “It from Qubit” Collaboration.
